

ABB delivers Foundation Fieldbus Technology to Snam Rete Gas

Sesto San Giovanni, Italy, May 12, 2004 - ABB, the leading power and automation technology group has delivered Industrial IT solutions for natural gas transportation. The gas plant, owned by Snam Rete Gas, is located in Favazzina,, Italy.

The scope of supply comprises Foundation Fieldbus technology for communication between the field devices and the automation system, Industrial IT system, HSE linking devices, and redundant controllers. The order also includes training, commissioning and start-up.

Snam Rete Gas ,owns and operates the natural gas transportation service in Italy, and its nationwide gas pipeline network system now extends for almost 30,000 kilometers. The gas plant in Favazzina receives the gas from North Africa via Sicily and supplies it to the Italian network. This project is part of the SNAM Rete Gas program to renew the automation of their gas pipeline network, the key to a reliable and efficient supply of gas to their customers.

ABB (www.abb.com) is a leader in power and automation technologies that enable utility and industry customers to improve performance while lowering environmental impacts. The ABB group of companies operates in more than 100 countries and employs about 113,000 people.
